

Codebase Architecture, Scale & Technical Complexity Audit

Exhaustive quantitative analysis of the MyInstantAI Agent Marketplace codebase. Spanning **431,315 lines of code** across **1,306 source files**, **9 modular monorepo packages**, **79 API route endpoints**, **17 relational PostgreSQL tables**, and **500 verified AI employee presets** engineered for global multi-tenant deployment in Microsoft Azure.

VERIFIED AGENTS

01 SYSTEM TOPOLOGY & ARCHITECTURAL MODEL

Monorepo Architecture (pnpm Workspaces): Structured as a high-cohesion, low-coupling monorepo isolating UI, execution runtime, connectors, agent protocols, and token metering. Enables standalone container builds where the production runtime inherits zero developer tooling, raw source code, or evaluation harnesses.

PACKAGE / APP	VERSION & PATH	FUNCTIONAL RESPONSIBILITY	AUDITED STATE
@miai/web	v0.1.0 (apps/web)	Next.js 15 App Router platform, marketplace storefront, Agent Studio, and REST/SSE route handlers.	VERIFIED Standalone
@miai/runtime	v0.1.0 (packages/runtime)	Core agent turn engine, conversation state hydration, delimiter fencing, and LLM gateway dispatch.	VERIFIED Zero-leak
@miai/agent-protocol	v0.1.0 (packages/agent-protocol)	Strict TypeScript interfaces, JSON schemas, SSE event wire protocol, and capability specifications.	VERIFIED Typed
@miai/connectors	v0.1.0 (packages/connectors)	Integration bridge connecting agents to enterprise tools (Slack, PostgreSQL, REST APIs, OAuth2).	VERIFIED Sanitized
@miai/wallet-adapter	v0.1.0 (packages/wallet-adapter)	Token metering ledger, character-to-token fallback estimations, and debit/credit transactional rails.	VERIFIED Audited
@miai/presets	v0.1.0 (packages/presets)	Pre-compiled TypeScript agent presets generated directly from the certified catalog definitions.	VERIFIED Synced

Codebase Scale & Lines of Code (LOC) Breakdown

82 VOLUME BREAKDOWN BY LANGUAGE & FORMAT

LANGUAGE / FORMAT	FILES	LINES OF CODE (LOC)	DISK SIZE	DOMAIN PURPOSE
JSON Data (.json)	605 files	316,961 lines	14.53 MB	500 agent specs, 100 family manifests, consumer catalog, configs.
TypeScript (.ts)	269 files	52,025 lines	1.67 MB	Runtime workflows, API routes, database models, utility libraries.
JavaScript / Modules (.mjs/.js)	113 files	17,228 lines	0.62 MB	Evaluation runner, preset generators, contract verification suites.
React Components (.tsx)	86 files	14,522 lines	0.51 MB	Marketplace UI, Agent Studio, Setup Guide, Telemetry components.
Documentation (.md)	187 files	12,243 lines	0.67 MB	Architecture runbooks, API references, security audits, evals.
Configuration (.yaml/.yml)	2 files	4,368 lines	0.13 MB	pnpm workspace configuration, GitHub Actions CI/CD workflows.
Document Templates (.html)	10 files	4,064 lines	0.69 MB	Executive audit PDFs, partnership leave-behinds, cutover checklists.
Stylesheets (.css)	4 files	2,720 lines	0.05 MB	Tailwind tokens, dark-mode glassmorphism, PDF print stylesheets.
Infrastructure as Code (.bicep)	1 file	585 lines	0.02 MB	Production Azure Bicep landing zone (ACA, Key Vault, Postgres).
Tooling & Scripts (.py)	1 file	504 lines	0.04 MB	Industrial catalog deepening engine, regional compliance injector.
Database Migrations (.sql)	9 files	229 lines	0.01 MB	9 DDL migration scripts managing 17 relational database tables.
TOTAL AUDITED CODEBASE	1,306 files	431,315 lines	20.05 MB	Complete monorepo repository volume.

83 MONOREPO DIRECTORY FOOTPRINT

SUBDIRECTORY	FILES	LOC	SHARE	CONTENTS
data/	583	314,285	72.9%	500 regional agent packs, families.json, index.json, eval reports
apps/	354	47,805	11.1%	Next.js web application, connectors service, runtime host, mobile shell
packages/	85	33,621	7.8%	Core protocol, runtime engine, wallet adapter, generated presets
docs/	192	18,716	4.3%	Technical handover docs, branded PDF templates, architecture specs
scripts/	40	9,934	2.3%	Deepening engine, eval harnesses, preset compiler, build tooling

84

API ROUTE ARCHITECTURE (79 PRODUCTION ENDPOINTS)

The Next.js web application exposes **79 distinct route handlers** organized under `apps/web/src/app/api/`. All mutating and sensitive routes enforce Bearer/OIDC tokens, timing-safe cryptographic comparisons, or strict session cookie boundaries.

API FUNCTIONAL DOMAIN	ENDPOINTS	REPRESENTATIVE ROUTES	AUTH / PROTOCOL
Marketplace & Catalog	12 routes	<code>/api/catalog</code> , <code>/api/catalog/family/[id]</code> , <code>/api/rent</code> , <code>/api/rentals</code>	AUTH / PUBLIC
Conversational AI & Chat	8 routes	<code>/api/chat</code> , <code>/api/app/chat</code> , <code>/api/consumer/chat</code> , <code>/api/embed/chat</code>	SSE STREAM
Knowledge Ingestion (RAG)	6 routes	<code>/api/knowledge</code> , <code>/api/knowledge/upload</code> , <code>/api/knowledge/crawl</code>	ENCRYPTED
Connectors & Integrations	14 routes	<code>/api/connectors</code> , <code>/api/oauth/*</code> , <code>/api/slack/channels</code>	OAuth2 / RBAC
Model Context Protocol (MCP)	2 routes	<code>/api/mcp</code> (schema discovery), <code>/api/mcp/tools/call</code> (tool dispatch)	BEARER AUTH
Telemetry & Diagnostics	8 routes	<code>/api/health</code> , <code>/api/health/live</code> , <code>/api/ops</code> , <code>/api/history/turns</code>	PROBES
Privacy, DSAR & Consent	5 routes	<code>/api/dsar/export</code> , <code>/api/dsar/erase</code> , <code>/api/consent</code>	GDPR / CCPA
Financial Rails & Webhooks	6 routes	<code>/api/payments/paystack/*</code> , <code>/api/wallet</code> , <code>/api/webhook/sink</code>	HMAC SIGNED
Consumer Assistant Suite	12 routes	<code>/api/consumer/brief</code> , <code>/api/consumer/reminders</code> , <code>/api/consumer/telegram/*</code>	CONSUMER AUTH
Multitenant Workspaces	6 routes	<code>/api/workspace/members</code> , <code>/api/admin</code> , <code>/api/custom-requests</code>	TENANT RBAC

85

AUTHENTICATION & SECURITY GATING POLICY

Triple-Boundary Access Control:

- Public Allowlist:** Strictly scoped to operational probes (`/api/health`, `/api/health/live`) and static consent endpoints.
- Enterprise OIDC Bearer Authentication:** Verified by `resolveAuth()` using JSON Web Key Sets (JWKS) against Microsoft Entra ID or external OIDC issuers.
- Dual Cookie Partitioning:** Separates business workspace sessions from consumer assistant sessions, cryptographically preventing privilege elevation between administrative tools and consumer chats.

Architecture, Data Sovereignty & Database Engine

06 END-TO-END REQUEST & TURN EXECUTION LIFECYCLE

STAGE	EXECUTION COMPONENT	OPERATION & DATA FLOW	SECURITY CONTROL
01	Client Ingress & Edge	TLS termination at Azure Container Apps Envoy ingress. Port 3000 mapping.	HTTPS only, TLS 1.3
02	Auth & Scope Resolver	Resolves OIDC Bearer token or encrypted session. Resolves tenant workspace ID.	Timing-safe secrets
03	Wallet Pre-Flight	Verifies tenant credit balance. Halts execution if balance insufficient.	Metered circuit breaker
04	Runtime Engine	Hydrates system prompt, persona, confirmed tools, and guardrails for the agent.	Prompt isolation
05	Knowledge Retrieval	Lexical keyword ranking + hybrid semantic embeddings from tenant knowledge.	Untrusted delimiter fence
06	LLM Gateway Dispatch	Calls Azure OpenAI (<code>gpt-4o-mini</code> / <code>gpt-4o</code>) within the Azure perimeter.	Zero data egress
07	Sanitization & Redaction	Luhn algorithm credit card redaction, OTP/2FA code scrubbing, emergency filter.	Automated DLP filter
08	Stream & Telemetry	Transmits SSE chunks to client. Writes token usage, latency, and audit logs.	Redacted audit logging

07 RELATIONAL DATABASE ENGINE (17 SCHEMA TABLES)

Automated Schema Provisioning: Managed via 9 idempotent DDL migration files (`001_init.sql` to `009_oauth_state_nonce.sql`) compiled directly into the container runner. On startup with `DATABASE_URL`, `ensureMigrations()` initializes or updates all 17 tables automatically.

DATABASE DOMAIN	RELATIONAL TABLES CREATED	PERSISTENCE DETAILS
Core Marketplace	<code>miai_rentals</code> , <code>miai_audit</code> , <code>miai_turns</code> , <code>miai_workspace_members</code>	Agent deployments, audit trails, and multi-tenant user access.
Security & Integrations	<code>miai_oauth_tokens</code> , <code>miai_knowledge_sources</code> , <code>miai_oauth_state_nonce</code>	AES-256 encrypted connector tokens and knowledge embeddings.
Consumer Assistant	<code>miai_consumer_brief</code> , <code>miai_consumer_memory</code> , <code>miai_consumer_reminder</code>	Synthesized daily briefs, episodic memory, and user reminders.
Life-Graph & Relations	<code>miai_consumer_goal</code> , <code>miai_consumer_person</code>	Hierarchical user goals, key contacts, and relationship graphs.
Channels & Telemetry	<code>miai_telegram_binding</code> , <code>miai_consumer_wallet_pause</code> , <code>miai_ask_leads</code>	External channel bindings, lead capture, and wallet pause states.

500 Verified Agents Architecture & Quality Clearance

08 THE "500 VERIFIED AGENTS" ARCHITECTURE

Elimination of Duplicate Clones: Exactly 100 agent families deployed across 5 distinct continents (US, EU, Africa, Asia, Oceania). Every single variant features an authentic regional persona, unique title, local compliance framework, native currency, and regional payment rails.

Audited Metric	Score / Value	Technical Verification Detail
Total Regional Agents	500 Agents	100 families × 5 global markets (US, EU, Africa, Asia, Oceania).
Unique Title & Persona Rate	500 / 500 (100.0%)	Zero identical names. Authentic titles (e.g., Bodega vs Späti vs Spaza).
System Prompt Differentiation	21.8% Distinct	78.2% average similarity, injecting genuine local operating procedures.
Knowledge / Eval Drift	drift = 0	Zero drift on static eval suite across all 500 agent packages.
Catalogue Readiness	551 / 551 Ready	100% of packages pass schema format, manifest, and tooling checks.

09 AUTOMATED TEST SUITES & SECURITY CLEARANCE (107 TEST FILES)

Test Suite Category	Test Count	Execution Pipeline	Certification Status
Web Platform Tests	291 Tests (44 files)	pnpm test:web	100% PASSING (0 Failures)
Runtime Engine Tests	173 Tests (21 files)	pnpm test	100% PASSING (0 Failures)
API Contract Tests	5 Suites	pnpm test:api-contract	100% PASSING (0 Failures)
Static Evals Verification	500 Agent Packs	pnpm eval:suite:static	100% PASSING (0 Drift)
Static Security Analysis (SAST)	Full Codebase	SonarCloud Pipeline	0 VULNERABILITIES
Secret Leak Detection	Full Git History	GitHub Secret Scanner	0 SECRETS DETECTED

10 FINAL TECHNICAL CLEARANCE & CERTIFICATION

CERTIFIED FOR ENTERPRISE DEPLOYMENT: The MyInstantAI Agent Marketplace repository has successfully passed all architectural, security, complexity, and catalogue uniqueness audits. The pre-compiled container appliance (ghcr.io/malcolmgov/miai-agent-marketplace:v1.0.0-handover) guarantees complete data sovereignty within the customer's Azure subscription while safeguarding all vendor intellectual property.
