

COMMERCIAL FINALISATION PACK

Platform license — the Shopify of AI agents

First-to-market marketplace OS: 500 regional agents, 8,500+ evals, Trust Center, and cutover onto MyInstantAI rails. You are buying category ownership — not a pilot SKU.

- First to market
- 500 agents · 5 regions
- ~\$400 / agent / year

01 Why \$200k is the right ask

LICENSE

\$200k / year

Marketplace + full 500 · depth, security, regions, evals included.

RETAINER

\$30k / month

Keep first-mover edge: support, maintenance, new agents.

REV-SHARE

Rent 50% · Tokens 20%

Aligned upside · MyInstantAI keeps brand & token majority.

Value stack: Shopify-class marketplace OS · 55x4 catalogue · regional CCPA/GDPR/POPIA/PDPA packs · production security controls · 3,566 evals · 30-day cutover. Rebuild cost » license. **Lock Monday:** \$200k · \$30k/mo · rent 50/50 · tokens 20/80.

02 Decisions to lock

#	DECISION	OPTIONS	RECOMMENDATION
1	Entitlement	Subset vs full 500	Full catalogue under annual platform license
2	Term	Annual / multi-year	Annual, renewable
3	Exclusivity	None / market / vertical	Define if exclusive Agents marketplace for MIAI
4	IP	License vs assignment	License to MyInstantAI; MD retains reusable IP
5	Operations	MD / MIAI / joint	Joint 90 days, then named primary
6	SLAs	Hours + uptime on Azure	Draft after Azure owner named
7	Launch date	Public target	Set target; staging creds unblock Week 1

03 Pricing discussion

PARTNERSHIP FEES (FILL MONDAY)		END-CUSTOMER TOKENS (IN PRODUCT)		
LINE	AMOUNT	PACK	USD	TOKENS
Annual platform license (500 agents)	\$200,000 / yr	Starter	10	150k
Monthly support & development	\$30,000 / mo	Plus	20	420k
Rent / token rev-share	50/50 · 20/80	Growth	100	2.75M
		Scale	200	6.9M

Protocol per-agent rent bands can still inform *end-customer packaging* later — they are not the partnership entitlement model.

Asks, timeline, and Monday close

04

Open asks — their side

ASK	OWNER	STATUS
Annual license fee (+ signatory)		□
Staging OIDC (issuer, client, audience)		□
Staging wallet API		□
Model gateway endpoint + auth		□
Azure subscription / region owner		□
Production hostname / DNS		□
WhatsApp WABA / BSP ownership		□

05

30-day success criteria

A MyInstantAI user can **SSO in** → **activate / configure an agent from the licensed catalogue** → **run a tool-backed conversation billed to your wallet** → **on your hostname**.

Week 1–2

Annual license principles + staging rails.
Marketplace on staging OIDC / wallet / gateway.

Week 3–4

Domain + OAuth redirects; demo shortlist UAT;
Live Ops green; cutover rehearsal.

06

Monday close checklist

- ☐ Annual platform license = full 500 agents
☐ Annual fee (+ cutover fee) agreed or parked with owners
☐ Named owners: Auth, Wallet, Models, Azure, Commercial
☐ Target date for staging credentials
☐ Next working session booked
