

The Shopify of AI agent marketplaces — for MyInstantAI

First-to-market platform: merchants don't build payment rails — you shouldn't rebuild an agent catalogue, studio, trust layer, and regional packs from scratch. **500 agents · 8,500+ evals · US / EU / Africa / Asia / Oceania** — ready to sit on your identity, wallet, models, and Azure. ZA covered under Africa.

- First to market
- Platform license
- Eng. grade A · 80
- Postgres + Redis live
- August 2026

500 AGENTS INCLUDED	8.5k+ EVAL CASES	~398K TOTAL LINES OF CODE	A · 80 ENG. GRADE
-------------------------------	----------------------------	-------------------------------------	-----------------------------

01 Why this is worth \$200k

Shopify didn't win by selling "a few themes." It won by owning the **marketplace + commerce operating system**. Agents is the same bet for MyInstantAI: a first-party surface where every customer can browse, configure, connect Actions, embed, and meter prepaid tokens — with a deep catalogue already localised for five regions. Competitors shipping a chatbot wrapper are months behind this stack.

First to market Ship a branded agent marketplace while peers are still prototyping. Category ownership compounds; delay costs mindshare and deal cycles.	Depth × breadth 100 families × 5 markets = 500 packages — ~298K lines of authored catalogue IP (prompts, knowledge, tools, guardrails, evals) plus the runtime — not a thin demo set.
Security & trust OIDC + workspace RBAC, audit isolation, AES-256-GCM OAuth tokens, HMAC embed keys, CSP, DSAR export — Trust Center with honest Live / Partial / Planned tags.	Regional compliance Market packs encode US CCPA/TCPA, EU GDPR, Africa POPIA-style (incl. ZA), Asia PDPA-style, Oceania AU/NZ privacy — not one global prompt pretending to be local.
Evals as quality IP 8,500+ behavioural eval cases (~15 / agent) — regression harness for grounded answers, confirm-before-write, and cross-tenant refusals.	Build vs buy ~398K total lines already written (~298K catalogue + ~59K platform). Rebuild estimate ~\$0.75-0.95M · ~50-56 months — not a weekend clone.

Proposed commercial terms

Licensing a category-defining agent OS — marketplace, catalogue IP, trust & regional packs, evals — not renting six demos.

02 What the license buys

LAYER	INCLUDED UNDER \$200K / YEAR
Marketplace OS	Catalogue, Studio, Actions/OAuth, knowledge, chat, embed, wallet, Live Ops, Trust Center — ~398K-line codebase (~298K catalogue + ~59K platform) · 45 API routes · CI-gated quality
Catalogue IP	All 500 agents day 1 — prompts, knowledge, ~1,900 tools, guardrails, prepaid SKUs
Quality system	8,500+ evals; confirm-before-write workflows; honest capability tags
Trust & regions	Security controls + US / EU / Africa (incl. ZA) / Asia / Oceania market-pack compliance
Cutover path	OIDC, wallet, model gateway adapters; Azure Bicep + 30-day runbook; Postgres + Redis staging live

03 Fee structure

ANNUAL PLATFORM LICENSE

\$200,000 / year

Marketplace OS + **full 500-agent catalogue** — ~\$400 / agent / year. Annual, renewable. Not a limited SKU pilot.

MONTHLY RETAINER — 4 FTE POD

\$30,000 / month

Onboarding, support, maintenance & agent factory (10 credits / mo) — ~\$360,000 / year. Agents free at the edge; monetise on tokens.

04 Revenue share — token usage only

End-customer agents — free

No monthly agent rental. Aligns to MyInstantAI GTM: activate agents free, top up prepaid tokens.

Token top-ups — 20 / 80

MOOVE DIGITAL

MYINSTANTAI

80%

05 Year-one economics (illustrative)

COMPONENT	TO MOOVE DIGITAL	NOTES
Annual platform license	\$200,000	Full 500-agent entitlement
Retainer (4 FTE)	\$360,000	\$30,000 × 12 months
Agent rental share	—	Agents free — not charged
Token top-up share	20% of top-ups	Variable — sole upside meter
Fixed year-1 floor	\$560,000	License + retainer (before rev-share)

Deal terms at a glance

Commercial mechanics behind the headline — a fair starting point for the agreement.

86 Proposed terms

TERM	PROPOSED POSITION
Initial term	12 months from production go-live, auto-renewing for successive 12-month terms unless either party gives 60 days' written notice.
License fee	\$200,000 / year , invoiced annually in advance on the go-live date. Covers the platform + full 500-agent catalogue (100 families × 5 markets).
Retainer (4 FTE)	\$30,000 / month , invoiced monthly in arrears (net 30). Dedicated pod: 2× Customer ops / onboarding (activate/configure, training, go-live checklists, office hours, ticket triage) · 2× Engineering (integrations — OAuth/Actions, webhook/MCP, Install, cutover onto MIAI rails — plus bugs, maintenance, workflows, new/deepened agents, evals & go-live certify). Fair-use: 12 tenants / mo + training; 10 agent-factory credits / month (typically 6–10 SKUs / improvements). Excess scoped separately.
Revenue share	End-customer agents are free (no rental share). Token top-ups 20% MD / 80% MIAI — net Agents-attributed prepaid revenue after refunds and chargebacks.
Reporting & remittance	MyInstantAI reports Agents-attributed token revenue monthly; Moove Digital's share is remitted within 30 days of month-end. Either party may audit once per year.
Exclusivity	Non-exclusive. MyInstantAI receives the first-to-market advantage; Moove Digital retains the right to license the catalogue to other partners.
Intellectual property	Moove Digital licenses the agent packages & presets and retains ownership of all reusable IP. On termination, MyInstantAI keeps a license to agents already deployed to live customers for a 90-day wind-down.
Data protection	MyInstantAI is controller and customer of record; Moove Digital acts as processor under a DPA. Data residency follows the Azure tenancy per region (US / EU / Africa / Asia / Oceania).
Currency & taxes	All amounts in USD, exclusive of any applicable taxes or withholding.

What you are licensing

Roles are clear — and the codebase is already written. Catalogue IP is the moat; the runtime is the operating system.

07 Partnership roles

TOPIC	PROPOSAL
Moove Digital	Delivers & integrates Agents Marketplace; catalogue quality; staging ops; joint run post-cutover
MyInstantAI	Owns customer auth, wallet, models, primary Azure tenancy, brand, and end customers
Product home	Agents under MyInstantAI domain as a first-party surface
IP	License of agent packages / presets to MyInstantAI; Moove Digital retains reusable IP
Operations	Joint 90 days post-cutover, then named primary operator

08 Technical complexity

Measured monorepo size (excl. `node_modules` / `dist` / `.next`): the catalogue is **authored product IP**, not empty scaffolding — rebuilding both layers is years of specialised work.

TOTAL CODEBASE ~398K lines · 1,021 files Full written surface: platform + catalogue + config	CATALOGUE IP ~298K lines JSON 500 agents · prompts · knowledge · tools · guardrails · evals	PLATFORM RUNTIME ~59K hand-written LOC TS/JS/CSS/HTML · ~2.5K-LOC engine · 16 Actions · CI gates
---	--	---

LAYER	COMPLEXITY FACTS
Catalogue (moat)	~298K lines of market-localised agent packages (100 × 5 = 500) — cannot be "prompted up" in a sprint; each pack carries tools, guardrails, and evals
Backend	Next.js App Router · 45 route.ts · ~51 handlers · requireAuth → RBAC · zod · body caps
Actions engine	16 live connectors · OAuth2/PKCE · AES-256-GCM sealed tokens · DNS-pinned SSRF · HMAC webhooks
AI runtime	~2.5K-LOC turn engine · 4 adapters · live guardrails · lexical RAG · 10 workflows · 8,500+ evals
Data / DevOps	Postgres + Redis staging · CI + gitleaks + static-eval gate · Azure Bicep · Railway live
Rebuild avoid	Full ~398K-line surface: ~\$0.75–0.95M / ~50–56 months — partnership is the shortcut

NEXT STEPS

Delivery plan & proposed close

Staging is live today. Lock commercial principles, exchange credentials, and start Week 1.

09 30-day cutover plan

Week 1-2 – Integrate

Lock terms; receive OIDC, wallet, and model-gateway credentials; point marketplace at your rails – login → activate → chat → debit.

Week 3-4 – Go-live

Custom domain + OAuth redirects; UAT on demo shortlist; cutover rehearsal; Live Ops green on your hostname. Success: SSO → agent → billed tool turn on your domain.

10 Already built (staging)

CAPABILITY	STATUS
Catalogue – 100 × 5 markets (500) · ZA c Africa · 19 industries	Catalogue-ready
Runtime loop – browse → Actions → embed → wallet · Postgres + Redis	Live on staging
Security – CSP nonces · DSAR · SSRF pin · sealed OAuth · HMAC webhooks	Live
Actions (16) + OAuth/PKCE · Azure Bicep + Railway → Azure runbook	Staging / documented

11 Required from MyInstantAI

ASK	OWNER	✓
Commercial sign-off on terms in §03-06 (or marked counter)		□
Staging OIDC – issuer, audience, JWKS, sample JWT		□
Staging wallet API – debit / balance / top-up		□
Model gateway – base URL, auth, tool-calling		□
Azure subscription / region · production hostname / DNS · WhatsApp WABA/BSP		□

12 Proposed Monday close

☐ Agree **annual platform license \$200,000** for full 500-agent catalogue

☐ Agree **monthly retainer \$30,000** – **4 FTE** pod

☐ Agree: **agents free** · rev-share **tokens 20% MD / 80% MIAI** only

☐ Name owners (Auth, Wallet, Models, Azure, Commercial) · set credentials date

13 Snapshot & close

LICENSE

\$200k / yr

500 agents · ~\$400 / agent

RETAINER

\$30k / mo

2 ops · 2 eng · 10 credits

UPSIDE

20%

Tokens to MD · agents free

Ready when you are

Staging is live (Postgres + Redis). Catalogue, trust layer, and five regional packs are built – **500 agents · ~398K lines** ready to license. Week 1 starts when commercial principles and credentials are confirmed.
